# What's it like?

Our vinotherapy soaks are made up of a signature blend of minerals, warm water and yes — wine!

The soak is set to a temperature of 100-103 degrees to help you relax your muscles, absorb the healing nutrients, improve circulation and destress. Red wine is rich in antioxidants such as resveratrol, flavonoids, and polyphenols. These compounds help neutralize harmful free radicals in the body, reducing oxidative stress and inflammation, delivering a relaxing experience that is truly one-of-a-kind.
